

## MS Positions in Integrative Biology

The Penick lab at Kennesaw State University is recruiting students who are interested in pursuing an MS degree in social insect ecology, evolution, and behavior starting **Fall 2020**. The lab has multiple positions available for research projects focusing on urban ecology, insect-microbe interactions, and insect architecture. For more information about the Penick lab and current research, visit: [www.penicklab.com](http://www.penicklab.com)

Graduate students will be fully funded through a combination of teaching and research assistantships. Students will join the Department of Ecology, Evolution & Organismal Biology on KSU's main campus located within the Atlanta metropolitan area. KSU currently enrolls ~38,000 students and has easy access to downtown Atlanta as well as natural areas in the southern Appalachian region.

To learn more about the Master of Science in Integrative Biology program (MSIB) at KSU, visit: <https://csm.kennesaw.edu/msib/index.php>

All qualified applicants should contact Dr. Clint Penick prior to submitting an application to the MSIB program. Students with previous research experience working with social insects or in ecology and behavior are especially encouraged to apply.

If interested, please contact Dr. Penick at [cpenick1@kennesaw.edu](mailto:cpenick1@kennesaw.edu) and include the following in your email:

- (1) A brief description of your research interests and motivation for pursuing an MS degree
- (2) Unofficial transcripts
- (3) Current CV or resume

The deadline for priority admission is **15 January 2020**, and the final deadline is **20 May 2020**.
